Product Description

Linear light embedded black LED gypsum ceiling light trough living room corner aluminum profile slot product is a home decoration product that combines modern lighting technology with

Our Product

aesthetic design. The following is a detailed introduction to the product:

1. Product Overview

Linear light embedded black LED gypsum ceiling light trough, mainly composed of black LED light strip, gypsum ceiling light trough and aluminum profile slot and other components. This design is not only beautiful and generous, but also can effectively hide the lamps, making the overall space appear more tidy and unified.

2. Product Features

Aesthetics:

The black LED light strip is combined with the black aluminum profile slot, with unified color and smooth lines, which can be well integrated into various modern home decoration styles.

The design of the gypsum ceiling light trough makes the light softer and more uniform, creating a warm and comfortable home atmosphere.

Functionality:

The LED light strip has the characteristics of high brightness and low energy consumption, which can provide sufficient lighting effects while reducing energy consumption.

The embedded design makes the lamps do not take up extra space and are easy to install and maintain.

The aluminum profile slot has excellent heat dissipation performance, ensuring that the LED light strip works stably for a long time.

Durability:

The aluminum profile slot is durable and not easy to deform, and can withstand a certain amount of weight and pressure.

The LED light strip has a long life of up to tens of thousands of hours, reducing the frequency of replacing lamps.

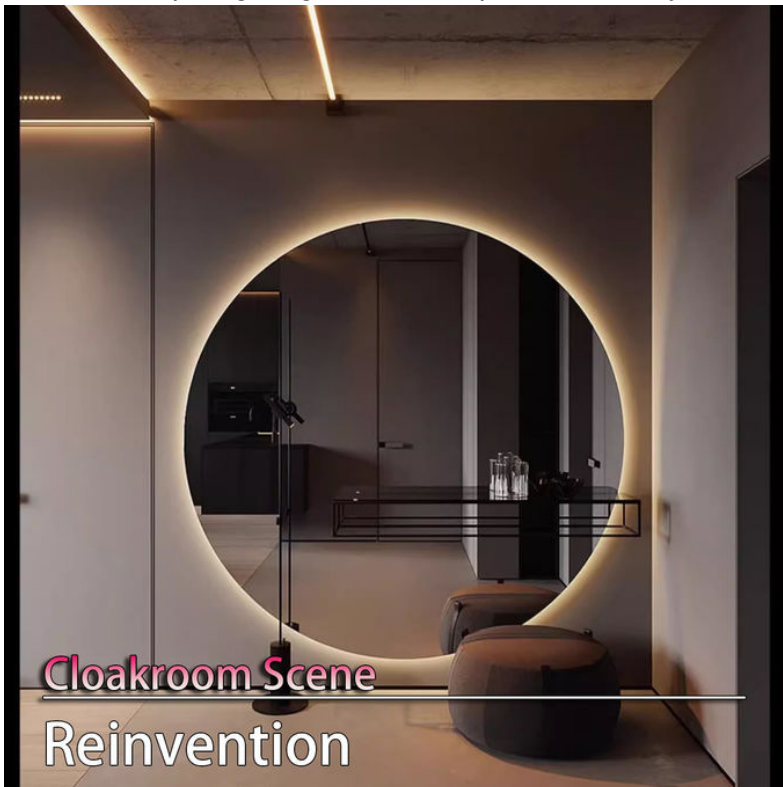

Suitable For Various Occasions

Various styles to meet the needs of different scenes

3. Applicable scenarios

This product is suitable for a variety of home scenes such as living rooms, bedrooms, study rooms, corridors, etc. Especially in the living room, through clever layout and design, the linear light embedded black LED gypsum ceiling light trough can be combined with the external angle aluminum profile slot to create a unique lighting effect and spatial hierarchy.

4. Installation and maintenance

Installation:

Before installation, it is necessary to ensure that the ceiling is flat and dry, and the corresponding installation position is reserved.

Operate according to the product manual and installation drawings to ensure that each component is installed in place.

Connect the power supply and test the lighting effect to ensure that everything is normal before proceeding with subsequent decoration.

Maintenance:

Clean the light trough and aluminum profile slot regularly to keep their surface clean and dust-free.

Pay attention to the working status of the LED light strip and replace it in time if there is any abnormality.

Avoid placing flammable items near the light trough to ensure safe use.

5. Purchase suggestions

Brand selection: give priority to products from well-known brands to ensure product quality and after-sales service.

Specifications and sizes: select appropriate specifications and sizes according to actual needs to avoid wasting resources or affecting lighting effects.

Cost-effectiveness: choose products with high cost-effectiveness within the budget, and do not blindly pursue low or high prices.

In summary, the linear light embedded black LED gypsum ceiling light trough living room corner aluminum profile card slot product is a home decoration product that combines beauty, functionality and durability. Through reasonable purchase and installation, it can add a unique charm and warm atmosphere to the home space.
