Basic Information

- Place of Origin: SHENZHEN CHINA
- Brand Name: YSENLED
- Certification: CE ROHS LVD EMS
- Model Number: YSR60X5630RA-F3
- Minimum Order Quantity: 10
- Price: Negotiable
- Packaging Details: 10*1000*20
- Delivery Time: 2DAYS
- Payment Terms: L/C, D/A, D/P, T/T, Western Union, MoneyGram
- Supply Ability: 100,000 meters per week

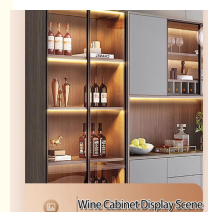

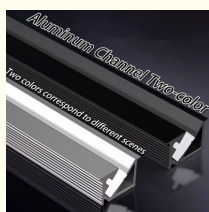

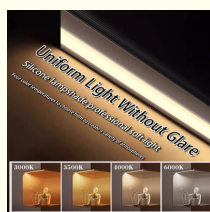

Product Specification

- Led Qty: 600pcs/ Roll
- Type: Industrial Flexible Led Strip Light
- Adaptoe: DC12V
- Controller: 44-key Controller
- Dimension: (W)0.08m*(T)0.02m*(L)5m
- Item Number: DW-50RG3
- Watt: 18W
- Viewing Angle: 120 Degree
- Size: 6*5000 MM/roll
- Led Chip: 5050 Smd
- Cuttable Length: Every 3 LEDs
- Life Span: 5 Years+
- Luminous: 20-22 Lum
- Remote Control Included: No
- Remote Control: Yes

Product Description

The following is a detailed introduction to the voice-controlled LED light strip products used in entertainment venues such as KTV bars, fitness and spinning rooms:

1. Product Overview

The voice-controlled LED light strip is an LED lighting product that integrates multiple functions such as voice control, fantasy, and horse racing. It is widely used in KTV boxes, bars, fitness and spinning rooms, etc., which can create dynamic and cool visual effects, enhance the atmosphere of the venue and the customer experience.

Our Product Introduction

2. Product Features

Voice control function: The product has a built-in high-sensitivity microphone that can capture the sound changes in the surrounding environment in real time, and automatically adjust the flashing speed and color changes of the lights according to the rhythm and strength of the sound, so as to achieve perfect synchronization between music and lights.

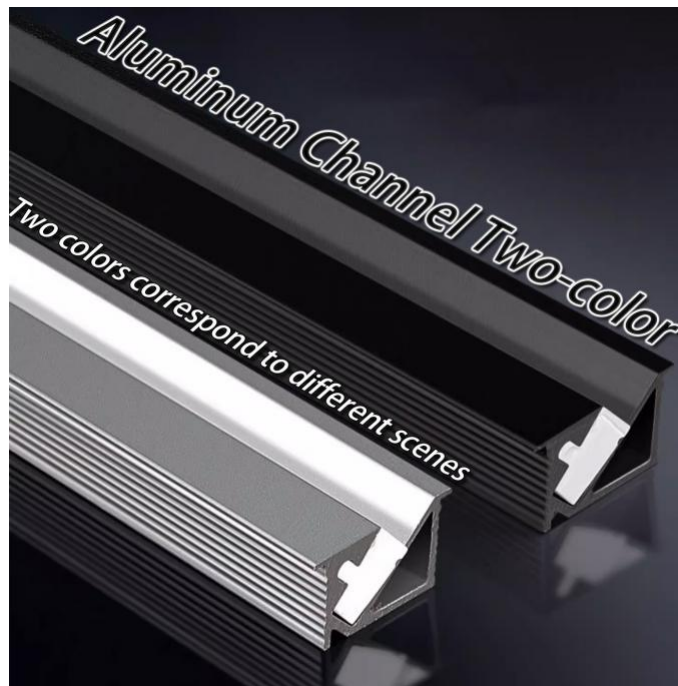

Fantasy effect: Using advanced RGB full-color technology, it can present colorful color changes, including red, green, blue, purple and other colors, as well as various transition colors and gradient colors produced by color mixing, adding more color and vitality to the venue.

Horse racing effect: The LED lamp beads on the light strip can move and change quickly according to the preset pattern or trajectory, forming a unique horse racing effect, attracting the customer's attention, and increasing the fun and viewing of the venue.

Programmable control: Some high-end products support programmable control. Users can customize and edit the lighting effects through remote control, mobile phone APP or professional control software to achieve more complex and personalized lighting effects.

Energy saving and environmental protection: Low-power LED chips are used as light sources, which have the advantages of high efficiency and energy saving, long life, low heat, etc., which conform to modern environmental protection concepts.

Easy to install and maintain: The product structure is reasonably designed and the installation is simple and fast; at the same time, the LED lamp beads have a long service life and a low failure rate, which reduces the later maintenance costs.

Hidden Lamp Installation

Does not destroy the overall coordination of the cabinet

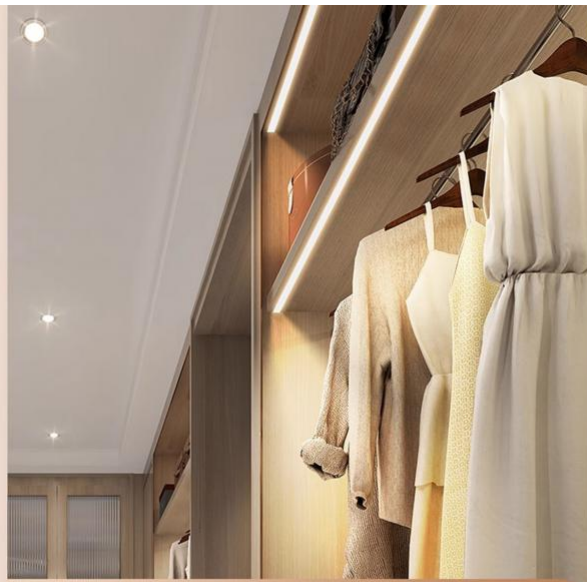

3. Product specifications

Length: Generally, it can be customized according to customer needs. Common specifications include 5 meters, 10 meters and other lengths.

Width and thickness: Depending on different product models and uses, the width and thickness of the light strip will also vary. Common widths are 14mm, 15mm, 16mm and other specifications are available; the thickness depends on the internal structure and material.

Number of LED lamp beads: The number of LED lamp beads per meter of light strip will also vary depending on the product model and purpose. Generally speaking, the more the number, the richer and more diverse the lighting effects.

Voltage and power: Common voltage specifications are 12V, 24V, etc.; the power depends on the length of the light strip and the number of LED lamp beads. Generally speaking, the greater the power, the higher the brightness, but the power consumption also increases accordingly.

5. Purchase suggestions

Choose the appropriate length and specifications according to the needs of the venue: Choose the appropriate length and specifications of the light strip according to the size of the venue and the lighting needs to ensure the lighting effect. Pay attention to the voice control sensitivity and lighting effects of the product: Choose products with high voice control sensitivity and rich lighting effects to ensure the perfect synchronization of music and light and the improvement of visual effects. Pay attention to product quality and after-sales service: Choose well-known brands and high-quality suppliers to ensure product quality and after-sales service.

In summary, the sound control console fantasy horse racing LED light strip is a powerful and effect-rich lighting product that can bring unique visual effects and atmosphere experience to places such as KTV bars and fitness dynamic cycling rooms. When purchasing, you need to pay attention to factors such as product specifications, voice control sensitivity, lighting effects, quality and after-sales service.
